**Bill Yenne : Going-to-the-Sun Road (Images of America)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Going-to-the-Sun Road (Images of America):

0 of 0 people found the following review helpful. Very Interesting Book to all who have an interest in Glacier National Park By Old Lady, But Not Done Yet! A nice book on the history of the building of Going to the Sun Road. Of special interest to anyone who plans to go to Glacier National Park or who has been there. I suspect that anyone who has an interest in the marvels of engineering would also find this book highly interesting. It is a wonderful documentation of those who planned and built this engineering marvel. 0 of 0 people found the following review helpful. Bill Yenne knows Going-to-the-Sun-Road. Road. As a top-notch author who grew up under the shadow of Going-to-the-Sun, Bill Yenne knows this road which leads to the Summit of Logan Pass, Glacier National Park. Yenne has an uncanny way of capturing the essence of any topic about which he writes. Be certain to include this book on your Montana bookshelf. Gail Shay Linne, Whitefish, Montana  
0 of 0 people found the following review helpful. Going-to-the-Sun-Road By Douglas A very nice book on the history of the Going-to-the-Sun-Road. The Going-to-the-Sun-Road today still takes a lot of work to keep it open and in operational condition. The road is a true civil engineering feat that was made possible through an a lot of hard work. Hopefully the road will be maintained into the future for all to experience.

The Going-to-the-Sun Road is rightfully recognized as one of the most spectacular alpine highways in the world and certainly among those in the United States. The landscape is one of peerless beauty, but the road itself is an engineering masterpiece. In 1910, Glacier National Park was created in that million-acre swath of mountains, lakes, and glaciers that the great naturalist George Bird Grinnell called the Crown of the Continent. Soon, plans were being made for a road that would take visitors into the heart of this amazing place. The result was the Going-to-the-Sun Road, which has been the centerpiece of the visitor experience in Glacier since it was formally dedicated in 1933.

About the Author Author Bill Yenne grew up within Glacier National Park, where his father was supervisor of back-country trails for nearly two decades, and for most of a decade he was supervisor of roads, including the Going-to-the-Sun. Yenne has written more than three dozen historical works, including many on the American West, such as a narrative of the Lewis and Clark Expedition and a biography of the great Lakota leader Sitting Bull.
