Sky Terrain, Kent Schulte : Grand Canyon Trail Map 5th Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Grand Canyon Trail Map 5th Edition:

0 of 0 people found the following review helpful. In addition to your GPS ...By PSU TomThis 5th Edition map is a very detailed topographic map of the Grand Canyon National Park and Kaibab National Forest . It's 1:40,000 scale provides all the important information you'll need to navigate above and below the North and South Rims. Trail profiles, trail descriptions and difficulty ratings are great enhancements for this water resistant map. I used it this summer and found it indispensable. It is a MUST for any serious Grand Canyon hiker,0 of 0 people found the following review helpful. The bestBy A. WhitleyGreat map! WAY better than the Trails Illustrated (National Geographic) version Grand Canyon, North and South Rims [Grand Canyon National Park] (National Geographic Trails Illustrated Map)1 of 1 people found the following review helpful. The Map to Plan With!By DisappointedDurable, easy to use. I love how prominent landmarks along the trail are marked. I recognize the contours, but I like to see the feature's name on it. Everyone hiking in the GC should carry a good topo map like this one.

Beautiful, accurate, very detailed and best selling Grand Canyon map is now available in the 5th edition. Local favorite. Waterproof and Tear Tough. Fine shaded relief and 100ft contours give a detailed stunning view of the Canyon topography. Mileage info to all trail junctions, plus cumulative mileage for select segments. Includes trail profile graphs. Thoroughly reviewed by Park Rangers. Detailed topographic trail map of 308,000 acres in central Grand Canyon. 1:40,000 scale covers 8 USGS quads. 308 miles (495km) of trails shown with trail ratings, text descriptions statistics. Most complete accurate map of the area. Includes 100ft contours, shaded relief, UTM grid for use with GPS, hydrology with springs drinking water (including a chart), backcountry use zones for permit planning, and other trip information. Printed on waterproof, tear-tough paper. This map covers the huge core of Grand Canyon National Park. This is the area where 99% of visitors travel and where 90% of overnight backcountry trips take place, and where most trails and reliable water sources are. The map does not cover the vast and more isolated western sections, nor the far NE corner. (Zoom into the inset maps above to see exact coverage.) Includes a handy and concise bus map. All in all this is a very useful and legible map. Hope you like the new edition!

About the AuthorKent Schulte lives in Boulder, Colorado. He is usually outdoors exploring the countryside.
