But the human mind also has a gnawing desire to make sense of things. One of the ways we do this is to name things so as to figure out how these things relate to each other and the whole. That is exactly what this book does; it gives your mind a way to begin to wrap itself around the immensity of the Grand Canyon. And the photographs are stunning. You will get a real sense of awe!0 of 0 people found the following review helpful.
