Steve Miller : Grand: The Colorado River in the Grand Canyon a Photo Journey before purchasing it in order to gauge whether or not it would be worth my time, and all praised Grand: The Colorado River in the Grand Canyon a Photo Journey:

0 of 0 people found the following review helpful. If your planning on running the Grand Canyon a great book for reference. By Kevin C. Hoffman If your planning on running the Grand Canyon a great book for reference. A mile by mile guide of the river and the most amazing spots. 5 of 5 people found the following review helpful. Great photography, great book. By Shannon P. Allen This is a unique book on the Grand Canyon. This book has beautiful pictures of the Grand Canyon seen through the eyes of a river runner. View some of the lush green side canyons that are accessible only from the river. This book is not only gorgeous to look at, it also contains geologic history and an interesting mile by mile narrative of rapids and geology that are viewed from the river. A must have, and great gift for any river enthusiast. 3 of 3 people found the following review helpful. Amazing photographs. By Ellen R. McDow This book has page after page of remarkable, vibrant photographs. From the extraordinary landscape, to the animals that inhabit the surroundings, to people running wild rapids--this book offers more than just a glimpse into the Grand Canyon. An absolute must-have for everyone-- be it nature lovers, river runners, or if you just want to admire the scenery, I can highly recommend this book!

The Grand: The Colorado River in the Grand Canyon, a Photo Journey follows the river from Lees Ferry to Mile 236 with more than 300 spectacular color pictures and expert commentary. Of the millions of people that visit the Grand Canyon every year, only a handful of them leave the rim and actually get to experience the river and inside of the canyon up close. Photographer Steve Miller presents the Canyon from the unique perspective that only a rafter can, leading you on a mile-by-mile journey to see and learn about the geologic formations, wildlife (including rafters!),

flora, trailside views, and, of course, the moods of the water, sky, and the canyon walls.
