We are actually on our second copy of this pamphlet. The first made it through nearly 100 miles of hiking in GSMNP, but the last backcountry trip of typical smoky mountain summer thunderstorms was too much for it. The pamphlet is lightweight and fits conveniently in a side pocket of a backpack. Though by no means comprehensive, it is a good field resource and contains the most likely birds in a geographic area. It is durable, but not entirely waterproof.

Small informative concise....just what we wanted for our backpack!!! I will order more from this vendor. We have enjoyed this book.

At least 240 bird species find permanent or temporary homes in the Great Smoky Mountains region, emblematic of the area's globally recognized biodiversity. This beautifully illustrated guide highlights over 140 familiar and unique species. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.
