2 of 2 people found the following review helpful. More of an outback trail map at best, not good for the regular vacationer  
By D. JockDoesn't really cover the areas where your average tourist (us) would need a map of. More of an outback trail map at best, not good for the regular vacationer. Now, if I were backpacking -- I'd want this map set.  
2 of 2 people found the following review helpful. Nice map, but.....  
By Nathan A JonesNice map and does what it's supposed to do. However, it doesn't use a standard scale so you can't use a military style protractor to locate specific coordinates. I'm sure most people don't care, but a few will.  
2 of 2 people found the following review helpful. Excellent, Useful Maps  
By Dwayne D.As is typical of the NG maps series, these two maps are highly detailed, waterproof, tear-resistant maps. They will withstand lots of use and will be very beneficial to any explorer of the Black Hills. Be aware that some minor roads go by different names than the numbered route identifiers on the map. That's not a big problem; just know that guide books and locals may identify a road differently from how the map does.

**Waterproof Tear-Resistant Travel Map**
