**Doe Boyle : Guide to the Connecticut Shore (Guide to Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Guide to the Connecticut Shore (Guide to Series):

6 of 9 people found the following review helpful. Poor QualityBy A CustomerI did not find this guide very helpful. The binding was of poor quality and the book fell apart after only a few days of use - travel guides should be durable to last at least a week long vacation. The information was not all that useful either.

The Connecticut Shore's attractions extend far beyond its beaches, as you'll discover in this ultimate reference to the state's coastal communities. Heavily urbanized in some parts and pristinely rural in others, the Connecticut shoreline includes a world-famous university, fishing villages, lighthouses, museums, and historic homes. Use this completely updated guide to find seafood restaurants, beautiful beaches, parks and nature preserves, antiques, shopping, campgrounds, cottage rentals, seaside inns, boating excursions, charters, eco-cruises, public boat launches, carousels, amusement areas, and places for family fun.

From Library Journal Boyle, a lifelong resident of the Connecticut shore, focuses on the 29 towns spread along the 120-mile Connecticut coast. Within this narrow scope she can afford to linger a while and savor some of the area's more obscure attractions. The entries, arranged geographically, provide all the required listings regarding accommodations, rates, and operating hours as well as information on annual events, such as dogwood festivals and fireworks displays. Also included is a history and profile of each town conveying the general character of the community and five special indexes covering topics such as beaches, museums, and seafood shacks. While photographs would have been a nice inclusion, Boyle's prose is so visual it made me homesick. A good resource for the traveler, armchair or otherwise; recommended for public libraries with strong regional/travel collections. A Thomas O'Connell, Murray State Univ.
