1 of 1 people found the following review helpful. a delightful book of history and lore of New York areaBy Deborah MacgillivrayI have a deep love for history. More than just the fact, it's the lore - the oral lore that is woven through it.

To me history always surrounded me, the curiosity of what a place was, what had happened there, who had owned it was like a big mystery waiting to be unraveled. It surprised me so many people dislike history, or see it as a dry list of dates and events. Britain was loaded with castles, duns, brochs, and stone rings. Layers of the people who inhabited the lands, not just The Picts, Scots, Gaels, Brits, Angles, but the Roman invaders. I found the South of the US was loaded with intriguing history. So many homes were touched by the War Between the States. Beautiful antebellum giants that survived the era, all carrying colorful tales. That is why I really enjoyed this book by Cheri Revai. Obviously, Revai loves history around her and sees it as a living thing reaching out to those curious enough to want to know the secrets. She has an easy writing style and does a good job of portraying events, researching this history and the lore of places believed to be haunted. Every time I pass some structure I always wanted to know what happened there. If someone says a place is haunted, it drives me to want the facts behind the tales. Revai does this. She gives you the roots of the tale, but then very thoroughly checks with the various owners to see the experiences - or not - of the different owners. She also tells you when a site is "by invitation only" so you know beforehand if you can actually visit the place. The book is a fascinating, spine-tingling collection of about 30 tales covering northern New York - Jefferson County, St. Lawrence County, Franklin County and Clinton County. So those of you planning a leisurely tour of the area to see the fall colors might wish to have this little guide to give your trip even more excitement. For writers, there is a wealth of tales to spur your imagination, so I highly recommend this wonderful book. P.S. It might interest you to know Cheri Revai is the sister of bestselling Sci-Fi Romance writer C. J. Barry! 0 of 0 people found the following review helpful. Fascinating and well researched, this collection of spine-tingling accounts of paranormal phenomena focuses on the restless spirits that haunt Upstate New York's rustic and weathered region known as the North Country. But perhaps what makes these stories so chilling is that each one of them is factual! The haunted sites covered in this book range from centuries-old mansions to mobile homes, and even commercial establishments such as bars, diners, and fraternity houses. The results of Revai's research show us that every haunting is unique in its own style and characteristics, although certain similarities exist between each. Gerina Dunwich, Occult author.
