overhead maps

Got this for use at the F.E. Walter Dam area in the Poconos. With no overhead maps and vague directions, it made finding the actual boulders very difficult. That said, when you DO find an area, the descriptions of the problems are sufficient to know what you are doing. The history and write-ups are great. I just wish that there were overhead maps, or even better, GPS coordinates of actual spots. These woods are thick!

It was a hit for the rock climber in our family who just happens to have a girlfriend from the state. Unique and specialized for my needs but a stand alone book nonetheless.
