Excellent.1 of 1 people found the following review helpful. best nat hist of rockies ever!By montana mani have been collecting native species books for the rockies for quite some time. i hike and work in the mountains and prairies of montana and am limited to what i can carry into the wild. this book is the best all

encompassing book for anyone interested in identifying and knowing the world around them as they swagger through Montana's great wilderness areas! 0 of 0 people found the following review helpful. Five Stars By Paul Joseph Guthrie Excellent book, well written and designed. Only draw back is it has only black and white illustrations.

Author Daniel Mathews provides in-depth scientific information on the natural world found between Grand Teton, Wyoming, and Jasper, Alberta. From conifers to lichens, grizzly bears to salamanders, and cutthroat trout to pine beetles this guidebook provides a thorough reference for hikers, backpackers, and armchair naturalists. Beautifully illustrated with color photographs and line drawings, Mathews covers a thousand species of plants, animals, fish, birds, and insects found in the northern Rocky Mountains.

""This book is exacting, funny, prophetic, sometimes dark, sometimes fantastic, and as rife with narrative pull as a fine novel. And that's only from an armchair. In the high country in summer it becomes a near-bible, opening a world that grows more mysterious and beautiful even as its grandeur is defined and its intricacies known. If I could own just ten books for the rest of my life, this guide to love of nonhuman neighbors would be one of them." From the Back Cover A field guide with a difference approach: fun to read with humour, personality and lyricism. Scientifically far-reaching and up to the minute, it covers a thousand plants, animals, fungi, microorganisms, rocks and historic naturalist-explorers, as well as the weather and geologic history of a magnificent region shared by two provinces, five states, and ten national parks. About the Author Daniel Mathews is the author of Cascade-Olympic Natural History and a contributing author of the National Audubon Society Field Guides to the Rocky Mountain States and the Pacific Northwest
