This book is beautiful and well made, you wouldn't be afraid of the book getting some wear and tear or even in rain. It was perfect for our whole family and my boys who can't read yet (3 5), love looking at the pictures.0 of 0 people found the following review helpful. This book is nicely

illustrated and easy to use

This book is nicely illustrated and easy to use. I think it will be very helpful in identifying different animals and plants in the Rocky Mountain regions.

By Ellicott City mom  
This book worked perfectly for our trip. It was light weight and contained all the plant and animal info we were looking for.

This guide includes information on mammals, fish, birds, trees, shrubs, wildflowers, insects and reptiles from Alaska to New Mexico. Each species has a concise yet thorough description, including range and habitat. Also includes seasonal highlights for parks in the Rockies and maps. 372 color illustrations, 8 maps.

About the Author  
LINDA KERSHAW is the best-selling author of a number of nature books published by Lone Pine. She is a career botanist who has consulted and done research for Environment Canada, the World Wildlife Fund, the Alberta Forest Service, the Canadian Forest Service and the University of Alberta. Her extensive field work has taken her into the vast Canadian boreal forest as well as above the treeline in the Rocky Mountains, on Ellesmere Island and in New Zealand. Linda now works as a writer and editor when not pursuing two of her favourite pastimes-- photography and illustration.  
ANDY BEZENER is a biologist and the author of nine nature guides for Lone Pine Publishing.
