Sacred Mountains of the World - The Pearls of Great Price By Arthur von Boennighausen Friends: After about ten years of high caliber solo Alpinism I was looking for more so I bought this book and started climbing the Sacred mountains of the world. Another ten years passed and I am now 53 years old. Was it worth twenty years of my life? I will let this quote answer this question: I meant to tell mankind to aspire to a new state about which I could tell them little or nothing, to teach them to tread a long and lonely path which might or might not lead thither, to bid them dare to encounter all possible perils of nature unknown, to abandon all their settled manners of living and to cut themselves off from their past and their environment, and to attempt a quixotic adventure with no resources beyond their native strength and sagacity, I had done it myself and found not only that the pearl of great price was worth far more than I possessed, but that the very perils and privations of the quest were themselves my dearest memories. I was certain of this at least: that nothing in the world except this was worth doing. Google my name to Learn more..... Arthur von Boennighausen 0 of 0 people found the following review helpful.
