**Steven N. Price : Seas. Gde.-Texas: A Month-by-Month Guide to Natural Events (Seasonal Guide to the Natural Year)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Seas. Gde.-Texas: A Month-by-Month Guide to Natural Events (Seasonal Guide to the Natural Year):

1 of 1 people found the following review helpful. Helpful information, but limited in scopeBy Kathy LivingstonThis

book is organized month by month. For each month, there are a few articles highlighting some very specific things to see. For instance, rafting in the canyons or watching for deer. At the end of an article, suggestions will be given for specific locales which are particularly suitable for this activity. That's all helpful information, but I was surprised by how location-specific the articles were. If you have the ability/inclination to travel around Texas to observe nature, then this book will help you know where to go and when. If you want a guide that helps you know what to look for in your own part of Texas, this guide can help, but there will be lots of articles that won't apply to your area at all. I found the following review helpful. Ok, but other 'Seasonal Guides' are better. As noted above, this is generally a useful guide organized by months. I wish it were a lot 'beefier'. As an avid sheller I was surprised that they put the shell walks in the fall, winter is generally a much better time to shell. A little bird slanted, ok, but was a little surprised about some of the things left out.

Texas Revels Its Awesome Natural Bounty In This Month-By-Month Guide To The State's Natural Events.

About the Author Steven N. Price has been a full-time writer and photographer for more than 20 years, specializing in outdoor recreation and travel. Formerly the outdoor editor of Southern Living magazine and the south regional editor of Field and Stream, he has written more than 2,000 magazine articles for dozens of national publications.
