National Geographic Maps - Trails Illustrated : Shaver Lake / Sierra National Forest, California (Trails Illustrated Map) (National Geographic Trails Illustrated Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Shaver Lake / Sierra National Forest, California (Trails Illustrated Map) (National Geographic Trails Illustrated Map):

1 of 1 people found the following review helpful. Definitely waterproof
By Craig M Fiehler
I used this map extensively when visiting the Huntington Lake area for an extended camping trip. I took several day hikes in which I consulted the map on many occasions. As USGS quad maps are harder and harder to obtain, I find myself using these hybrid topo maps. I found this map to be detailed enough for almost any application. It was accurate and it was easy to read the legend items and contour lines. This map is also made of a flexible plastic material. This came in handy when my dog pulled me into a creek during a break in my hike. We slid down some slick rocks for a few meters before pulling ourselves out. After drying out for a few minutes, I noticed that the map (which had been in my pocket) was gone. I looked downstream and saw it at the bottom of a 4-5 foot deep pool. I used a long pine branch to fish it out and the map was none the worse for wear. Totally fine. A paper map would have been a ball of mush at that point. So in this case, this product was superior to a paper USGS topo map. I just wish these maps were available for more areas. Great product. Happy hiking!
0 of 0 people found the following review helpful. Actually better than the forest service maps i purchased
By Travis
Actually better than the forest service maps i purchased. I have about 5 maps of this area... but I keep this one on me when i go into Sierra National Forest. Wish this one was in book form.
0 of 0 people found the following review helpful. A Detailed Guide to This Part of the Sierras
By NaNaT
This map is a glorious and unexpected find. Every trail, every road, every little detail of the Shaver Lake area is right there, and since I live near the bottom left corner of the map, I am thrilled to have a guide for exploring this gorgeous part of California.

Trails Illustrated Shaver Lake / Sierra National Forest is the second of five exciting new maps for the California Sierra Nevadas that will combine to form seamless coverage of the high-use National Forest areas between Sequoia / Kings Canyon National Parks and Lake Tahoe. This region contains some of the most visited backcountry in the United States, popular with hikers, mountain bikers, anglers, hunters, and winter sports enthusiasts. Like all Trails Illustrated maps, Shaver Lake / Sierra National Forest was developed in collaboration with local agencies and experts, in this case the Three Forests Interpretive Association which supports Sierra, Stanislaus, and Sequoia National Forests. Shaver Lake contains coverage for Sierra National Forest, Kaiser Wilderness, Dinkey Lakes Wilderness, portions of the John Muir and Monarch Wilderness, Mariposa Grove of Giant Sequoias within Yosemite NP, Nelder Grove Historic Park, Millerton Lake State Recreation Area, Redinger Lake, Bass Lake, Huntington Lake, Courtright Reservoir, Wishon Reservoir, and Shaver Lake. Scale = 1:63,360 Size: 26" x 38"

About the Author
Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
