Kathy Morey, Mike White, Stacy Corless, Thomas Winnett : Sierra North: Backcountry Trips in California's Sierra Nevada before purchasing it in order to gauge whether or not it would be worth my time, and all praised Sierra North: Backcountry Trips in California's Sierra Nevada:

0 of 0 people found the following review helpful. Ok, but not as good as I hoped. By Customer This is good as an introduction to trails in The Sierras. I think it was too spread out. It has a few hikes in each of a bunch of areas, instead of really having detailed coverage of large swaths of The Sierras. 4 of 5 people found the following review helpful. Maps need to reference adjacent maps By Constant Reader This book has a problem that I have run into before, and it is

so basic that it is really hard to understand how it can happen. There are many maps in the book, and while they are generally good, they do not indicate which map to move to when moving off of a particular map page. This makes following a longer route very difficult. For this reason the book -- and its companion for the South -- of very limited use to me. This is for the 8th edition of the book. Hopefully this has been corrected in the new edition. 0 of 0 people found the following review helpful. Well organized book to aid in planning a High Sierra ...By CustomerWell organized book to aid in planning a High Sierra backpack trip. I really appreciate the effort involved in compiling this information.

Now in its 9th edition, the completely updated and revised Sierra North showcases new trips and old favorites in regions such as Desolation Wilderness, Emigrant Wilderness, the proposed Castle Peak Wilderness, and the world-famous Yosemite National Park.
