**Clive Walker : Signs of the Wild: A Field Guide to the Spoor Signs of the Mammals of Southern Africa** before purchasing it in order to gage whether or not it would be worth my time, and all praised Signs of the Wild: A Field Guide to the Spoor Signs of the Mammals of Southern Africa:

0 of 0 people found the following review helpful. African animal tracksBy tripleIf you are planning a trip to Africa and want a better idea of what track you are looking at in the dirt, this will help you. It is also a great reference tool if you want to learn about African animals. There is 1 great colored photo of each animal, part of country they live in,

along with a description, measurements, weight, diet, faeces and spoor (foot print). A good use for this book is: there are 2 kinds of rhinos, black white. but they are grey and their territories overlap. This book will help you notice what the difference is between them. 0 of 1 people found the following review helpful. Very Satisfied Customer By James Mcnamara The book is very well written. Complete and easy to read. I feel this is a "must" book for the hunter.

This compact field guide to the identification of Southern African mammals based on their spoor, droppings and skulls has long been a top seller. This edition offers up-to-date information on identification through signs; provides new illustrations for a number of species; and features illustrations of skulls for all of the carnivores. It also offers an 8-page section of comparative spoor, updated with the most recent information available. It includes distribution maps and full-color photographs of each species.
