We planned a stop about halfway through somewhere in Ohio. The hotel was given a two diamond rating making it reasonable for a quick stopover with quality and price. When we got there, we were a mile away from the state prison, half the lights were burnt out, the wall paper in the lobby was peeling and the entire street sign was out. I called the phone number listed in the book to make sure I was in

the right place and that they were open. I was and they were, but I told my wife that we weren't stopping there. We lived in Manhattan for years, but I didn't feel safe there. In short, make sure you know where you're going and look up the hotel websites before making reservations. 9 of 9 people found the following review helpful. Accurate Listings By Fulminata One of the problems I see repeatedly with products like this is that they become out of date quickly with hotels changing their pet policy. We recently took a trip from California to Arkansas that I was unable to fully plan in advance. When it came time to stop for the night we'd check the book for a city that had several pet friendly hotels listed, just in case policies had changed at our first choice, or there wasn't room. We were able to get a room at the first place we called every time. I'd recommend the latest edition of this book to anyone traveling with a pet. 1 of 1 people found the following review helpful. Best Buy By bookman We bought the book because we always travel with our dog. We've had problems in the past finding a motel that we would use would also accept our pet. This book a cell phone absolutely eliminated that problem. We would routinely call the higher rated motels in the town we would reach in the late afternoon to reserve our room on a 4000 mile trip we never had a problem. Saved lots of time aggravation.
