**Hal Margolis : Trekking Along: The Pacific Crest Trail Through Southern California** before purchasing it in order to gage whether or not it would be worth my time, and all praised Trekking Along: The Pacific Crest Trail Through Southern California:

1 of 1 people found the following review helpful. Hiking adventure of Harold MargolisBy David G. CovellAs one who loves the PCT and has made mostly day-hikes from Campo to Cottonwood Pass over several decades, I was somewhat disappointed that the author had not made a through-hike over that same part of the PCT, and in fact had skipped some of it in favor of motor transits. Those few parts that I had been unable to hike because of the long distances between trail-heads were of special interest to me, but turned out to be unrevealing--maybe I hadn't missed anything! Descriptions of flora and fauna were pretty general, esp. the flora, and so not very instructive. Finally, the book needed an editor--lots of grammatical and spelling errors and typos. I suspect the book is of most value to the author and his family as a memoir of a rather long vacation trip.0 of 0 people found the following review helpful. Reads like a diaryBy Peggy FoxSomewhat helpful, one person's experience. Was looking for more of a bigger picture to prepare for the PCT in southern California as well as the day by day ups and downs.0 of 0 people found the following review helpful. Detailed Description of the Desert Section of the PCTBy Andrew SimpsonThis book really describes the experience of walking the first 700 miles of the Pacific Crest Trail in great detail, punctuated by moments of humor and strange situations. My only complaint is that it is a bit long, but a good read nonetheless for anyone considering hiking this section or the whole trail.

A narrative of the adventure of backpacking the first 700 miles of the Pacific Crest National Scenic Trail, from the Mexican border to the southern Sierra Nevada. Included are maps, mileage markers, elevations and descriptions of the trail tread, scenery, flora and resources along the way. There is a supplement on plant identification and another on matters of water carriage.
