**John Kamper, Donna Kamper : Tucson Uncovered (Uncovered Series City Guides)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Tucson Uncovered (Uncovered Series City Guides):

With its colorful history of Indians, Spanish explorers and cowboys, cattle drives, railroads, and mining, Tucson is undeniably an Old West town. Though much of its modern-day appeal lies in the mild winters, world famous golf

courses, and tasty Mexican food, this is much more to this contemporary Arizona metropolis. Discover all of its unique places and interesting events with this book as your guide. Written for old-timers who love the history of this Western town as well as newcomers and visitors, Tucson Uncovered is a fascinating historical guide for those who want to remember the Wild West the way it really was and those who want to learn more about this jewel of the desert.
