The book has lots of good information and is written generally enough for people to understand. There are also some nice road logs to guide a trip to see interesting stuff written about in the book.0 of 0 people found the following review helpful. Five StarsBy Karen GrayAs an Arizonan it is very interesting discussion of Northern AZ volcanoes.0 of 0 people found the following review helpful. GoodBy Melodee GutierrezInformative and enjoyable.

This book provides a popular look at the fiery origin of Northern Arizonas landscape. With magnificent aerial photographs, original geologic illustrations, and detailed road logs to many of the key features, this book is an indispensable tool for the traveler, the educator, and all who are interested in the remarkable landscape of northern Arizona.

About the AuthorMichael Collier is a science writer, photographer, and physician who lives in Flagstaff, Arizona. Among his other books is A Land in Motion: California's San Andreas Fault.
