What I like most about this book is that it not only tells you WHERE to walk, it tells you WHAT to see when you get there. "As you get to this open field, be sure to look left to see...." What more could you expect from a field guide?

By M. T. Dove
Living on Long Island my entire life, I found this book extremely validating of my own experiences with travels on the island. I know that many of the landscapes have changed in the past 10 years since the book was written, but each one is still well worth the trip. If you are one that wants to leave the city for the weekend or wants to enjoy the heritage and nature that our own backyard produces, which we are unaware of, this is your guide. Enrich your life, go outside, breath the fresh air, and talk a walk with this book, you won't be disappointed.

Now you can discover and celebrate Long Island's natural treasures. Alice M. Geffen and Carole Berglie describe thirty of the region's scenic and accessible trails through parks, bird sanctuaries, and along the shore. Most walks are about a mile long and suitable for the entire family. Complete information is provided on each trail's location, length, highlights, and especially native plant, animal, and bird species. Arranged from west to east, these walks and rambles include: Jamaica Bay Wildlife Refuge Welwyn Preserve Fire Island National Seashore David Sarnoff Pine Barrens Preserve And many more from the acclaimed to the undiscovered
